

ENHANCED COMMUNICATIONS

THE SMARTEST INTERCOM PRODUCTS FOR TODAY'S CUSTOMER SERVICE ENVIRONMENT

SSE and the IXT Series 1500 intercom system represent a personal and flexible means to communicate with your customer while maximizing functionality and optimizing space for your facility.

Audio only or Audio with One- or Two-Way Color Video... designed to meet your changing needs

Enhanced Communications

AUDIO COUNTER STATION

- High quality two-way audio
- Durable touch-sensitive keypad
- Lane keys are configurable for up to 16 lanes with either numbers or colors
- Volume up/down controls by individual console
- Individual ring tones for each lane
- Privacy feature bypasses microphone and speaker when optional headset or handset is in use
- Easy setup procedure using keypad of one station for programming entire system
- Designed for easy installation using standard CAT 5 cable for entire system

Audio/Video Counter Station shown with color-tab lane identifiers

AUDIO/VIDEO COUNTER STATION

Same features as the Audio Counter Station plus:

- Integrated 16x9 aspect ratio color LCD screen
- High resolution color video camera
- Adjustable design allows camera and video screen to be raised from 12" to 15", and allows the screen to tilt for optimal view
- Lane camera tilt controls to ensure proper image of customers in different height vehicles
- Audio and video controls with a single CAT 5 cable
- Available as One- or Two-Way Video
- Wall mount versions available

AUDIO/VIDEO LANE STATION

- Mounts inside customer unit or transaction drawer to provide communication to Audio/Video Hub through single CAT 5 connection
- Provides connections for:
 - Speaker
 - Microphone
 - Call Button
- Plus Optional:
 - 16x9 aspect ratio color LCD screen
 - Armored Handset for privacy
 - Remote Traffic Sensor
 - Remote Relay-Controlled Device
 - High Resolution Color Lane Camera with remote tilt mechanism

Audio/Video Lane Station

AUDIO/VIDEO HUB

- Performs all voice/video signal routing functions for multi-lane systems
- System settings are stored on internal memory and can be copied to a removable media card for security or replication purposes
- Tough steel housing containing Counter, Lane and System cards designed to be wall-mounted anywhere that is convenient
- Basic Hub will accommodate 1x2, 2x2, 2x3, 2x4, 3x3, 3x4 and 4x4 Counter/Lane configurations
- Capacity easily expanded for up to 8 Counter Stations and 16 Lanes
- Separate video outputs per lane for feeds to security system recorder
- Video and audio inputs for advertising messages
- Accepts CAT 5 cables from Counter and Lane Stations

Enhanced Customer Communications with Fast and Reliable Performance

Optional Wireless Headset

All counter stations can be configured in the field to operate up to 16 lanes, with many different combinations of color- or number-tab lane identifiers.

The headset switch allows each teller to have a designated wireless headset while sharing a single IXT 1500 Counter Station. Tellers simply select position 1, 2, 3 or 4 at the start of their shift and put on their personal headset.

FIELD UPGRADABLE

In addition to being featured as standard equipment in all new installations of IXT 7000 and 5000 pneumatic systems, the IXT Series 1500 intercom is an integral part of the IXT MTD Transaction Drawer. Authorized Security Systems Equipment Dealers are also able to retrofit existing installations of both current production as well as legacy SSE Remote Transaction Systems to enhance performance and extend their useful life.

Expand, Upgrade and Maintain Your Security Equipment Systems Today and Tomorrow

At SSE you define the best solution to meet your needs. We'll deliver the combination of equipment and systems that enable you to efficiently and economically meet those needs. From IXT Remote Transaction Systems to Gold Series Vault Doors, our physical security equipment product lines are designed to easily upgrade to the latest technology.

Unify your brand and corporate colors into the IXT 7000 Remote Transaction System or color the equipment systems to match your building's architectural palette or community standards. Drive-up units, teller drawers and window exteriors can be painted in thousands of powder-coat color combination options.

Upgrading to the IXT 5000 Remote Transaction System couldn't be easier with this low-voltage, drop-in replacement unit, optional fully integrated one or two-way color video system and 4" or 4 ½" tubing.

IXT Walk-Up Customer Units are a dream to install because they mount directly to the front of a wall, increasing your installation options and eliminating the need for access behind the wall. Matching the Walk-Up Customer Unit to your interior design is simple with the wide pallet of color options available.

Your SSE Authorized Dealer is available to help you design, plan and complete any size project.
