

IXT WALK-UP CUSTOMER UNITS OFFER THE SMALLEST FOOTPRINT

This is your solution for lobby walk-up customer units with the least invasive installation setup in the industry. The unit can mount to any structural wall and any height allowing for ADA compliance.

Show Your Colors Walk-Up Customer Units

Unit shown with optional writing shelf

The Walk-Up Customer Unit can install with three different teller unit options:

Upsend Manual

Upsend Automatic

Upsend Two-Sided Manual (Rear View)

EASIEST INSTALLATION

- The compact design mounts directly to the front of a wall and is completely front serviceable eliminating the need for access behind the wall and increasing your options where a unit can be installed
- A narrow profile allows for an unobtrusive and sleek service station
- Because the unit is suspended from the front of the wall and does not use a base, it can be mounted at any height to create an ADA-compliant customer service station
- You have the choice to use the IXT optional writing shelf or utilize your own millwork

EASIEST SERVICE

- Fully serviceable from the front

CUSTOM COLORS

- The IXT Series Walk-Up Unit can be color matched to blend in with your building color scheme or to match your institution's marketing program

CUSTOMIZABLE FOR YOUR NEEDS

- Each IXT Series Walk-Up Unit comes with fully integrated customer handset, lane station, call button, 17" color monitor, and motorized tilt camera for easy "Plug and Play" compatibility with the state-of-the-art IXT Series 1500 Audio/Video System
- The IXT Series 1500 Audio/Video System can also be programmed to run your institution's commercials on the Walk-Up Unit's 17" monitor
- PVC and Steel tubing available to complete a package designed to meet your unique site requirements
- Optional "Open/Closed" signs can be mounted above each unit

ENVIRONMENTALLY FRIENDLY

- All construction materials used in customer and teller units are RoHS compliant – details available upon request
- All painted surfaces are powder coated, releasing no VOCs during manufacture
